Purpose

The primary colors represent the core identity of **CocoFuse**. They communicate the brand's essence: hydration, freshness, energy, and natural vitality. These colors create instant recognition and must remain consistent across all major brand touchpoints.

Usage

Primary colors should be used as the dominant palette in all designs taking upto 70-80% of the design space. They form the base of packaging, hero backgrounds, logos, key UI elements, and major communication pieces. Their role is to anchor the visual identity and ensure a unified brand experience across digital and physical platforms.

Purpose

The secondary colors support and extend the visual identity of CocoFuse. They add flexibility, flavor differentiation, and expressive energy to the brand. Each secondary color is intentionally chosen to represent specific product experiences, such as mango, watermelon, and rose drink.

Usage

Secondary colors should be used as accents and supportive elements, occupying around 20–30% of the design space. Their role is to highlight, differentiate, and guide attention while keeping the primary colors dominant.
Use secondary colors for:

- Flavor labels and variant differentiation
- Accent shapes and supporting patterns
- Section dividers
- Icons and illustrations
- Social media highlights
- Promotional callouts
- Tags, stickers, and badges
- Background accents for specific campaigns
- Decorative gradients
- Emotion- or flavor-led storytelling visuals
- Black for all text

Typography

Typography plays a central role in expressing the personality of CocoFuse. Our type system strikes a balance between playfulness and premium clarity, ensuring the brand feels fresh, modern, and approachable across all touchpoints. Together, **Wedges** and **Poppins** create a distinctive yet highly functional visual identity.
